Certified Information Systems Auditor (CISA)

Prerequisites for Exam:

The following security-related certifications and information systems management experience can be used to satisfy the indicated amount of information security work experience:

Two Years:

- Certified Information Security Manager (CISM) in good standing
- Certified Information Systems Security Professional (CISSP) in good standing
- Post-graduate degree in information security or a related field (e.g., business administration, information systems, information assurance)

One Year:

- One full year of information systems management experience
- Skill-based security certifications (e.g., SANS Global Information Assurance Certification (GIAC), Microsoft Certified Systems Engineer (MCSE), CompTIA Security +, Disaster Recovery Institute Certified Business Continuity Professional (CBCP), ESL IT Security Manager)

The experience substitutions will not satisfy any portion of the three-year information security management work experience requirement.

Once a CISA candidate has passed the CISA certification exam and has met the work experience requirements, the final step is to complete the CISA Application for Certification.

A candidate is given 4 hours to complete a 200 multiple-choice question exam.

The exam fees for ISACA member is US \$360 and non-member US \$480. Candidates can save US \$50 on the exam registration fee by registering online.
