

# CompTIA Network+

Network+ is an international, vendor-neutral certification that recognizes a technician's ability to describe the features and functions of networking components and to install, configure and troubleshoot basic networking, hardware, protocols and services.

## Who Should Attend:

Ideally, IT professionals with 18 to 24 months of experience, however there are no formal pre-requisites, anyone who wishes to take the Net+ exam may do so. CompTIA Net+ certification is considered an industry standard of competency for IT technicians who are responsible for network functionality. It validates your technical leadership in network issues and technology.

## Course Content:

- Basic components of network theory
- Major network communication methods
- Network data delivery methods
- Major types of network implementations
- Components of a TCP/IP network implementation
- Major services deployed on TCP/IP networks
- Characteristics of a variety of network protocols
- Components of a LAN implementation
- Components of a WAN implementation
- Major issues and technologies in network security
- Components of a remote network implementation
- Major issues and technologies in disaster recovery
- Major data storage technologies and implementations
- Primary network operating systems
- Major issues, models, tools, and techniques in network troubleshooting

## Prerequisite for Exam:

CompTIA's Net+ exam consists of 74 questions, and you have 90 minutes to complete this exam. To pass, you need to answer at least 54 questions correctly, with a score of 73 percent.

For the most up-to-date listing of the Net+ exam objectives and exam releases, please visit: <http://certification.comptia.org>

**Course Length:** 5 days.
