

CompTIA Server+

CompTIA's Server+ is a vendor-neutral certification that validates the competency of advanced IT technicians. The Server+ Certification confirms a technician's knowledge of Industry Standard Server Architecture (ISSA) technology, technologies such as RAID, SCSI and multiple CPUs, as well as capabilities with server issues, backup, including disaster recovery.

Who Should Attend:

Mid-level to upper-level service managers, service technicians, systems engineers/administrators, help desk staff, system analysts and network analysts and architects.

Course Content:

An advanced level of knowledge relating to the implementation and maintenance of server environments, with core hardware and software competencies, including:

- Introduction to Servers
- Installing Servers
- Configuring Servers
- Maintaining Servers
- Upgrading Server Components
- Exploring Environmental Issues Surrounding Servers
- Troubleshooting Servers
- Exploring Disaster Recovery Concepts and Techniques

Course Length: 5 days.

Prerequisites for Exam:

The test is 80 questions and must be completed within ninety minutes. The minimum required passing score is 75%. Cost of the test voucher is \$185.00 for members and \$235.00 for non-members.

Passing the exam validates your technical leadership in server issues and technology. The Server+ credential can be used as an elective towards Microsoft Certified System Administrator certification.

CompTIA Server+

About the Instructors:

Jerry Riddle, CISSP, CISA, CISM, CAP, CCSE, CCSA, CCNA, CCDP, CCNP, CCEA, CCI, CCA, CNE, MCSD, MCDBA, MCT, MCSA, MCSE+I, ITIL-F, VCP

Jerry Riddle is the Vice President of IT Security services with Transcendent Group. Previously, Jerry was senior Vice President of Data Management Systems, an IT engineering and technical training group which he co-founded in 1996. Data Management Systems, Inc. serviced many Fortune 100 companies and multi-nationals. Jerry has more than 20 years experience and an extensive portfolio of experiences and expertise in capacity planning, system design, IT security, performance engineering, data center consolidation, modernization and virtualization. He has worked in the manufacturing, banking, chemical, education, defense, transportation, telecommunication and utilities industries.

Chad A. Peterson, CISSP, CCA, MCSE, MCT, SCSE, STA, SPS, ITIL-F

Chad Peterson is a Senior Security Consultant with Transcendent Group. He has twelve years of IT experience with specialization in IT Security. Chad has worked for and with organizations such as CA (formally Computer Associates), Microsoft, and Symantec. He has held the positions of Security Director, Training Director, Senior Consultant, and Senior Security Trainer. He has served as a trusted advisor to many organizations in assisting them to determine what security solutions were the right fit for their needs. Chad has authored and presented CISSP and general security training courses for public and corporate clients.
